SetTimer — Exercise Routine Interval Timer

A modular, client-side Progressive Web App (PWA) for building and running custom interval workout routines with a **3-Level Recursive Exercise Tree** (Groups, Subgroups, and Exercises), **Prepare Time** countdown, and high-output synthesized gym audio. Designed to be hosted directly on GitHub Pages.

Key Features & Module Structure

- `index.html` — Application layout for Edit Mode (3-Level Tree Editor, Prepare Time, Default Rest, Volume Slide Bar, Excel Backup/Restore) and Full-Screen Run Mode (with Tree Breadcrumb Badge and Color State Machine)
- `styles.css` — Styling for Edit Mode cards, Group/Subgroup containers, Drag & Drop indicators, Volume Slide Bars, and Full-Screen Run Mode states:
  - **Bright Blue (`#0284c7`)**: Opening Prepare Time (`PREPARE`)
  - **Bright Green (`#00c853`)**: Active Exercise Set (`WORK`)
  - **Bright Orange (`#ff6d00`)**: Rest Between Exercise Sets (`REST`)
  - **Bright Yellow (`#ffd600`)**: Rest Between Exercises or Group Repeats (`UP NEXT`)
  - **Grey (`#52525b`)**: Paused (`PAUSED`)
  - **Bright Red (`#d50000`)**: Routine Complete (`END`)
- `storage.js` — `localStorage` persistence and recursive tree sanitizer supporting up to 3 levels (`Group -> Subgroup -> Exercise`), deep-cloning, and automatic migration of flat routines
- `dragdrop.js` — Tree-aware HTML5 drag-and-drop reordering within any parent level
- `excel.js` — SheetJS (`.xlsx`) and `.csv` export/import module preserving full tree hierarchy (`Node ID`, `Parent Group ID`, `Node Type`, `Tree Level`, `Tree Path`, and `Prepare Time (s)`)
- `timer.js` — Depth-first recursive tree traversal engine, countdown state machine, and dual-oscillator Web Audio API synthesizer with sustain-release envelope, perceptual volume curve, and dynamics limiter
- `app.js` — Main UI controller connecting 3-Level Tree Edit Mode, Run Mode, Volume Slide Bars, and Service Worker registration
- `manifest.json` & `sw.js` — Web App Manifest and offline Service Worker for Android Chrome WebAPK installation
- `favicon.ico`, `favicon.png`, `apple-touch-icon.png`, `icon-192.png`, `icon-512.png` — App icon suite
